

**ACACIA SPECIES RECORDED IN THE DUBBO AREA\* ©**

(within a 40km radius of Dubbo and including all of Goonoo Community Conservation Area)

Subject to amendment by further research

|  |  |
|--|--|
| <i>acinacea</i>                              | <i>ixodes</i>                                  |
| <i>aneura</i>                                | <i>leucoclada</i>                              |
| <i>brownii</i>                               | <i>lineata</i>                                 |
| <i>buxifolia</i> subspecies <i>buxifolia</i> | <i>muelleriana</i>                             |
| <i>caesiella</i>                             | <i>neriifolia</i>                              |
| <i>calamifolia</i>                           | <i>omalophylla</i> synonym <i>homalophylla</i> |
| <i>cardiophylla</i>                          | <i>pendula</i>                                 |
| <i>caroleae</i>                              | <i>penninervis</i>                             |
| <i>cremiflora</i>                            | <i>pilligaensis</i>                            |
| <i>cultriformis</i>                          | <i>polybotrya</i>                              |
| <i>deanei</i> subspecies <i>paucijuga</i>    | <i>pravifolia</i>                              |
| <i>deanei</i> subspecies <i>deanei</i>       | <i>rigens</i>                                  |
| <i>decora</i>                                | <i>salicina</i>                                |
| <i>difformis</i>                             | <i>sertiformis</i>                             |
| <i>doratoxylon</i>                           | <i>spectabilis</i>                             |
| <i>farnesiana</i>                            | <i>subulata</i>                                |
| <i>flexifolia</i>                            | <i>tindaleae</i>                               |
| <i>gladiiformis</i>                          | <i>trineura</i>                                |
| <i>hakeoides</i>                             | <i>triptera</i>                                |
| <i>haviglandiorum</i>                        | <i>verniciflua</i>                             |
| <i>implexa</i>                               |  |

**Prepared by DFN&CS for Wattle Day 2002 to assist residents' choice of local flora plantings.**

**Details of common names, sizes, horticultural requirements can be obtained by consulting resources available at your local library / websites / local plant nursery**
